## Density

1. What is density? (Describe in detail)
2. What is the density formula?
3. Put the density formula in a triangle.
4. What is the formula for volume?
5. What is the formula for mass?
6. What are the two labels for density?
7. What is the density of pure water?
8. A density of 2.3 g/ml will float or sink?
9. A density of 0.44 g/ml will float or sink?
10. What is the density of a brick that has a mass of 25g and a volume of 5 cm<sup>3</sup>?
